

## **About Us**

Benzing Surveying, LLC is a surveying firm located in Waukon, Iowa, the heart of scenic Allamakee County near the Mississippi River. The area is known for its natural beauty and outdoor leisure activities, including some of the best hunting and fishing in Iowa. The company was established in 2015 and provides quality, professional surveying services for boundary, mapping and construction surveying in both Iowa and Wisconsin. The company is unique in that surveying is the heart and blood of our company, not a side service, tool, or branch of a larger company.

Our projects include a broad range of activities with the majority being land surveying which includes: Plat of Surveys, subdivisions, monument preservation, and NSPS/ALTA surveys. We provide construction surveys for roads, bridges and new construction. We gather topographic and hydrographic survey data using sUAS (drones) and a remote-control Hydro Boats. This variety ensures our employees gain experience in all areas of surveying.

In addition, employees benefit through daily mentoring under our licensed Professional Land Surveyor, Ryland Benzing, a past Adjunct Instructor at Hawkeye Community College for Land Surveying classes. Ryland enjoys passing along his expertise to aid in employee development. Benzing Surveying utilizes the latest field and office software. The office provides an attached heated shop with ample inside storage for our 4x4 survey trucks and ATVs with heated cabs and tracks to help get around no matter the terrain or conditions. Our crews are equipped with tools that make our tasks easier to accomplish and maximize productivity.

## **Position for Survey Technician – Entry Level**

We are seeking a Survey Technician to join our team. The position involves assisting a Professional Land Surveyor and other survey technicians with the following tasks:

- Researching recorded documents for deeds, surveys, easements, and other documents
